

# Solar bracket for taking photos in the swimming pool

How do you remove a solar cover from a swimming pool?

To remove the solar cover from an above ground pool, pull it up and out of the cradles. The solar cover is folded accordion-style to fit properly within the cradles when not in use. Once removed, the cover can be placed back over the pool when needed.

Can solar rings cover a pool?

Inflatable and containing multiple magnets, solar rings can be interlocked to cover as much of the surface of the pool as possible. Linking them together is also a preventative measure from having them sucked in by the pool's skimmer. However, due to their circular design, you'll always have small areas of the surface that won't be covered.

What is a quick-to-mount solar saddle?

The quick-to-mount solar saddle is a simple solar cover reel alternative for an above ground pool. It features five smooth cradle hooks that allow for the solar cover to be easily collected and maintained, keeping it neat and out of the way while swimming, without taking up space on your deck or lawn.

What is a pool Solar Ring?

A pool solar ring is a circular cover that rests on the surface of the pool. Like a normal solar pool cover, they're made of dual layers of heavy duty, UV-resistant vinyl - but they're smaller, and look like a lily pad.

How do I install a solar cradle on my above ground pool?

To install a solar saddle on your above ground pool, space the five cradles evenly apart from one another when mounting. Allow 2'-3' of solar cover length on each end from the outermost cradles. The installation hardware is included in the package.

Should you use a solar pool heater?

If you have a bit more budget to play with, it's a good idea to consider a pool solar cover and solar cover reel combination. This is the easiest, most effective way to use a solar pool heater and leverage that sweet, sweet solar heat for your pool. It's also the least likely to disappoint in terms of performance.

Solar Pocket consists of five j-hooks that are evenly spread to conveniently hold any solar cover up and off of the ground. Metal brackets hold the j-hooks which hangs freely off of the top rail of a swimming pool. To visualize a good placement of the Solar Pocket, simply lay your solar cover folded on the ground next to your swimming pool.
