

Solar company description Ethiopia

Does Ethiopia have solar energy?

Ethiopia aims to diversify its electricity generation capabilities by investing into an energy mix, of which photovoltaics will be a part. There are excellent conditions to use solar energy in Ethiopia, in particular in Tigray Region and on the eastern and western rims of the Ethiopian Highlands (roughly 2% of Ethiopia's area).

How many solar home systems are there in Ethiopia?

There are also around 40,000 small off-grid Solar Home Systems (including slightly larger Solar Institutional Systems) for remote rural areas of Ethiopia with a total installed capacity of another 4 MW e. All SCS power plants combined have an installed capacity of around 30 MW e.

Is there a private investment in solar power plants in Ethiopia?

However, there was no private investment in solar power plants in Ethiopia. Mainly the Ethiopian Electric Power Corporation (EEPCo) has been a state-owned and vertically integrated monopoly that controls the market from generation to selling of electricity throughout the country.

What is the history of solar PV systems in Ethiopia?

In the next section, brief overview of previous studies and historical background of PV systems in Ethiopia is included. The first standalone solar PV system in Ethiopia was introduced in the mid of 1980s to a remote village located in the central part of the country.

How much does solar electricity cost in Ethiopia?

In the Ethiopian case, they found that the cost of solar PV generated electricity showed large variability across different areas ranging from about 66 cents/kWh to more than one dollar [14, p. 222]. In general, very limited studies on the cost of solar electricity in sub-Saharan African countries (including Ethiopia) have been conducted.

Can Ethiopia become a power hub for the Horn of Africa?

Ethiopia has many renewable resources covering wind, solar, geothermal, and biomass, and the country aspires to be a power hub and the battery for the Horn of Africa. Aside from the grid projects different local and foreign investors are developing off grid solar PV projects, he noted.

Solar Development is one of the leading solar companies in the country, established in 2008. The mission of the company is to provide clean and sustainable energy for 80% of the population currently living without access to electricity in Ethiopia.
