Who is PowerSource 1800?

PowerSource 1800 Owner's Guide About Xantrex Xantrex Technology Inc. is a world-leading supplier of advanced power electronics and controls with products ranging from small mobile units to utility-scale systems for wind, solar, batteries, fuel cells, microturbines, and backup power applications in both grid-connected and stand-alone systems.

How much power does a PowerSource 1800 use?

Use products with a total power consumption within PowerSource 1800's continuous power rating of 1440 W. Use products with a total starting surge power within PowerSource 1800's capability of 2880 W. Have the damaged product serviced by a qualified technician.

Is a PowerSource a good alternative to a gas generator?

The quiet, battery operated PowerSource is a better alternative to gas generators and can be used indoors during extreme weather. The PowerSource is ideal for critical devices that require uninterrupted power because it can instantly transition from AC wall power to its internal battery power in the event of a power outage.

Why is my PowerSource 1800 not working?

PowerSource 1800 has detected an over-temperature condition. PowerSource 1800 has exhausted its available battery power. PowerSource 1800 may require service. Make sure the products plugged into the AC outlets are not exceeding the output power rating of the unit when supplying backup power. Try removing or substituting some of the products.

How do I test the powersource 1800 backup power capabilities?

To test the PowerSource 1800 backup power capabilities after installing the unit, unplug the AC power cord to simulate a power outage. Ensure the products connected to the PowerSource 1800 continue operating. You can test the surge capabilities of the PowerSource 1800 by turning connected products on and off while the unit is unplugged.

Does the powersource work with solar panels?

The integrated solar controller is compatible with most solar panels and uses the standard Anderson connector. You can even connect the PowerSource to your vehicle via the daisy chain terminals to use the vehicles' alternator for recharging when solar or AC power is not available.
