

Solar integrator Australia

How many employees does solarig Australia have?

The company has around 1000 employees and is headquartered in Madrid, Spain. Solarig Australia was created in 2018 and is one of the leading providers of solar operations and maintenance services in Australia, operating over 850MW of solar generation assets in the country across the eastern States and Western Australia.

Why should you choose solarig Australia?

Solarig Australia has established strong local capabilities in greenfield solar, energy storage and green hydrogen project development, joint venture formation and management, project planning, financing and compliance. Australia is a critical strategic market for Solarig.

Why is Australia a strategic market for solarig?

Australia is a critical strategic market for Solarig. We aim to continue our strong growth since 2018 to become a major force in Australia's clean energy transition. We are committed to Driving Energy Transition, supporting global decarbonisation and helping to achieve energy independence in the markets and societies where we operate.

Who are solar installers?

Our core business activity is installing solar systems for residential, commercial and government organisations, as well as the distribution of solar and energy efficiency products to dozens of companies around the country. We have installed over 60,000 solar systems within group, and are the leading rooftop solar installer in Australia by volume.

Does solapro install solar panels in Australia?

Solapro did the first installation in Australia earlier in 2021, which was a replacement of an existing roof-top solar array in favour of the integrated solar panels. The integrated panels can be optimised with a SolarEdge inverter to maximise power output in the same way we do for a roof-top solar array and we can give you Smart Home options.

Is Solis a leader in solar inverter technology?

Ningbo, China - August 13th, 2024 - Solis (Ginlong Technologies), a global leader in solar inverter technology, proudly announces it has received the #1 ranking position in global residential inverter shipments, as reported in the latest Wood Mackenzie inverter market share report.

Ultimately, residential and commercial solar customers, and utilities and large-scale solar operators alike, can benefit from solar-plus-storage systems. As research continues and the costs of solar energy and storage come down, solar and storage solutions will become more accessible to all Americans. Additional Information
