Does Guernsey have on-island solar?

Alan Bates, CEO of Guernsey Electricity Community solar Guernsey has already started on-island renewable generation with community-scale solar arrays feeding over 350kW of renewable solar power into the grid. This means that no matter your property size, a portion of your electricity will always come from on-island solar energy.

Will Guernsey Electricity install a community-scale solar array?

Guernsey Electricity are delighted to have worked with The Little Green Energy Company to install another vast community-scale solar array, this time on the roof of the newly reopened GROW Ltd headquarters.

Why should you choose Electric in Guernsey?

In Guernsey today, over 90% of the electricity we use annually comes from renewable sources such as hydro, wind and solar power. So when you choose electric - whether to heat your home, drive around, or cook your dinner - enjoy peace of mind that your choice is helping Guernsey take a step towards a cleaner, greener future for our island.

What is Guernsey's Electricity strategy?

In September 2023 The States of Guernsey agreed the Electricity Strategy. This detailed document covers the period up to 2050 and sets out a high-level strategic plan of how Guernsey could meet the anticipated increase in demand for electricity.

Where is the Bailiwick of Guernsey located?

The Bailiwick of Guernsey is located in the Bay of St Malo off the west coast of Normandy facing the Atlantic Ocean. It is well positioned to be a major contributor to the emerging marine renewable energy market and meeting the needs of the 21st century, given its situation with some of the strongest tidal currents in the world.

Where can I find information on Guernsey and Sark?

Information on Guernsey can be found on the States of Guernsey website ([www.statesofguernsey.gov.gg](#)), and information on Sark is available at [www.sark.gov.gg](#). Both Guernsey and Sark are located around 80 miles south of the UK mainland and around 30 miles from the European continent.

EcoFlow solar generators are an extensive range of diverse solar panels paired with iconic EcoFlow power stations sporting 256Wh to 7200Wh capacities. With the top-ranking IP68 weatherproof rating and unrivaled 23% solar conversion, it secures a limitless power supply for protection against power failure, off-grid self-sustaining, outdoor ...

3 ???%0183; In 2023 Guernsey Electricity worked in conjunction with The Little Green Energy Company to install the vast community-scale solar array at Grow Limited's newly redeveloped headquarters. The 310 photovoltaic (PV) panels will produce 129-kilowatt peak power (kWp). That's enough electricity to supply power to approximately 35 homes.

Pathway A is described as the most expensive at about %163;1.9bn and includes maintaining the current cable to France, via Jersey and improving the diesel generators at Guernsey Electricity's power ...

Using a solar panel, solar generators take in power from the sun, then store the power in their integrated batteries. The power is converted to usable AC power, allowing you to charge your devices. Solar generators are eco-friendly, quiet to run and, after the initial purchase, very affordable.

Solar electricity panels, also known as photovoltaics (PV), capture the sun's energy and convert it into electricity that you can use in your home. You'll need a more or less south-facing, unshaded roof or garden area.

The continued investment in renewables will mean higher energy costs as someone has to pay for all this. It either comes out of taxes or the consumer has to pay for it. Either way, you pay, but ...

Guernsey has already started on-island renewable generation with community-scale solar arrays feeding over 350kW of renewable solar power into the grid. This means that no matter your property size, a portion of your electricity will always come from on-island solar energy. And more will come in future.
