How much does a solar panel inverter cost?

Quick Takeaways: Solar panel inverter costs can range from £500 to £2,500. String inverters are cheaper than microinverters, but the latter offers more advantages and a longer lifespan. Other factors that can impact the solar panel inverter cost include your system size, inverter efficiency, and whether it's grid-tied or off-grid.

What does a solar panel inverter do?

The solar panel inverter is one of the most vital components of any solar energy system. Without it, you wouldn't get any power from your panels. It converts the electricity your solar panels generate (DC) into the type of electrical current your home appliances and National Grid can use (AC). But how much does a solar panel inverter cost?

Which solar inverter is best?

String inverters are the most common in solar energy systems as they are the most cost effective and, while they aren't as efficient as some other kinds of inverter, they are very reliable, can handle 5 - 10 panels at once and are cheaper to replace.

How much does a microinverter cost?

Microinverters can cost from £20 to £100 a unit. It can cost around £2,500 for the average solar panel system comprising 14 panels, including installation costs like wiring. You'll face greater upfront costs when creating a system that uses microinverters, and the bill can be quite high if you're planning on a large installation.

How many types of solar inverters are there?

There are three different kinds of solar inverter that you can use with your solar panels. As is the case with any sensible industry, you get what you pay for. A string inverter (or centralized inverter) is the cheapest of the three options. It functions as a lone operator, processing the DC electricity of all your solar panels.

What is a solar inverter?

A solar inverter is a vital segment of a solar power system that converts the direct current (DC) electricity produced by solar panels into alternating current (AC) electricity, which is suitable for powering your home appliances and feeding back excess electricity into the grid.

An inverter is a vital piece of equipment in a solar panel system and without it, your home would essentially be unable to generate usable power from its solar panels. In this post, we delve into solar inverter costs, the ...
