Solar panels can be found in various locations across Aruba, including residential buildings, and commercial properties. Many homeowners and businesses have embraced solar power as a way to reduce electricity costs, increase energy independence, and contribute to a greener future.

How do solar panels work? Solar panels are made up of photovoltaic (PV) cells which convert sunlight into direct current (DC) electricity, during the day. The electricity is fed to an inverter which converts the electricity into grid-compatible AC power, (which is what is used in your home).

Better Solar Aruba: Free energy for Aruba. High quality solar solutions for a better price. We can implement a complete solar panel solution for your home or business but we can also provide you with Cash & Carry DIY solutions. Green energy for a great price.

Solar panel to power house Aruba

A recent study found that solar panels are viewed as upgrades, just like a renovated kitchen or a finished basement, and home buyers across the country have been willing to pay a premium of about \$15,000 for a home with an average-sized solar array. Additionally, there is evidence homes with solar panels sell faster than those without.
