Solar panels for home power Cyprus

What are solar panels used for in Cyprus?

Solar panels in Cyprus are used for residential,industrial and commercial properties. Other than home use,many businesses install photovoltaic panels in Cyprus for self-consumption. That is,they use the energy the photovoltaic system generates directly,but cannot store any excess energy for following months.

Where can photovoltaic panels be installed in Cyprus?

Photovoltaic systems can be installed on flat and inclined roofs and on the ground. Our team can visit the place where you want the solar panels to be installed,evaluate the amount of space,sun exposure and possible shading and suggest the best place so that you make the most out of your photovoltaic panels in Cyprus.

Should you install a photovoltaic system in Cyprus?

In conclusion,installing a photovoltaic system in Cyprus can bring many benefits,from reducing energy costs to decreasing carbon footprint. When considering installation,it's important to evaluate various factors such as energy needs,space and orientation,efficiency and power output,durability,and cost.

How much does it cost to install solar panels in Cyprus?

The average price of installing solar panels has dramatically dropped over the last decade to almost 90%, allowing more people to afford such an investment. In Cyprus, it is estimated that it takes about 1.5 to 4 for the investment to pay off. The final price heavily depends on the specifications of your project and your needs.

Who is eligible for a photovoltaic system in Cyprus?

Anyone with Cyprus permanent residencyis eligible for a photovoltaic system in Cyprus,given that the property they want the panels to be installed on is interconnected with the EAC network and it was built according to the regulations of the Department of Town Planning and Housing.

Can a non-residential solar system be installed in Cyprus?

Residents of Cyprus who haven't installed any other PV systems with any other Government Grant Scheme are entitled to apply for a non-residential solar panel project,and the panels can be installed either on the roof of the applicant's premises or on the ground. The contract between the producer and the EAC lasts 10 years.
