Solar panel mounting system on roof of Pacifica wastewater treatment plant. Photovoltaic mounting systems (also called solar module racking) are used to fix solar panels on surfaces like roofs, building facades, or the ground. [1] These mounting systems generally enable retrofitting of solar panels on roofs or as part of the structure of the building (called BIPV). [2]

Grounding PV modules to reduce or eliminate shock and fire hazards is necessary and required by Electrical Code in countries in USA, Australia etc. The grounding guidelines of the Code essentially state that all electrical equipment is to be grounded by means of direct attachment to an equipment grounding conductor. This can be done in many different ways.

We offer a range of technologies, sizes and efficiencies of modules / solar panel or solar cells, ready for any installation. Storage Storage goes hand in hand with solar PV allowing owners to run their homes and businesses on low-cost, sustainable energy, and is also cost-effective in standalone systems.
