

Solar power fountain in the goldfish tank

Solar panels. Solar-powered pond pumps either have a separate rectangular solar panel that sits up to five metres away from the pump at the poolside, or an integrated panel in the middle of a self-contained solar-powered floating fountain, which sits on the water surface.. The larger the panel, the more watts of solar panel energy it can create to power the pump.

Save on energy and running costs with solar-powered pond pumps for your garden pond. The eco-friendly way to pump water around your pond, easy to install and even easier to run. You will only need a location, which receives enough daylight.

The SIEGES Mini Solar Power Pump Kit is a 60 gallon-per-hour pump that works best in small ponds for circulation and aesthetics. The pump is submersible and operates at 9 volts and can move water upwards of 2.5 feet ...
