3 ???· Solar energy - Electricity Generation: Solar radiation may be converted directly into solar power (electricity) by solar cells, or photovoltaic cells. In such cells, a small electric voltage is generated when light strikes the junction between a metal and a semiconductor (such as silicon) or the junction between two different semiconductors. (See photovoltaic effect.) Small ...

The Sol-Ark 15K-2P-EMP Residential Hybrid Inverter is a transformerless DC device that can convert up to 19,500W of solar power into 15,000W of continuous AC power. It features three MPPT trackers, enabling it to handle multiple PV strings with a wide voltage range (150-500V).

Today, anyone can set up a solar power plant with a capacity of 1KW to 1MW on their land or rooftops. Ministry of New and Renewable Energy (MNRE) and state nodal agencies are also providing 20%-70% subsidy on solar for residential, institutional, and non-profit organizations to promote such green energy sources.
