Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).

247Solar Plant(TM) 247Solar Plants generate continuous clean energy all day and night, in any weather. Our next-gen concentrated solar power (CSP) plants capture the sun's energy at a higher temperature (970C) than regular CSP and store it in simple ceramic pellets.

This image shows two islands, Miquelon and Saint Pierre, located south of Newfoundland, Canada. These islands, along with five smaller islands, are a self-governing territory of France. A thin barrier beach divides Miquelon, with Grande Miquelon to the north and Petite Miquelon to the south. Saint Pierre Island is located to the lower right.
