

A cup of coffee has around 100mg of caffeine while an average 12oz energy drink has ~90mg of caffeine! Solstice contains 40mg of caffeine and lasts 400 breaths. But caffeine is a lot more effective if inhaled. So it only takes 5-10 breaths of Solstice to feel the same as a cup of coffee or an entire can of Red Bull.

Cook Islands Renewable Energy Investment Plan (REIP) report finalised in 2021 and outlines plans for Stage 2 and Stage 3 Renewable Energy Project Scoping Report ; Outlook: Commencement of the Stage 2 and ...

Renewable energy in the Cook Islands is primarily provided by solar energy and biomass. Since 2011 the Cook Islands has embarked on a programme of renewable energy development to improve its energy security and reduce greenhouse gas emissions, [1] with an initial goal of reaching 50% renewable electricity by 2015, and 100% by 2020. [2]

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

At the 2022 United Nations Climate Change Conference (COP27) it was reported that the Cook Islands has converted 13 of its 15 islands to solar energy and set a target of 2025 for the remaining two. The target was revised to 2030 in September last year by director of Renewable Energy Development, Tangi Tereapii.
