

Somalia lumian energy

Why is electricity a luxury in Somalia?

Electricity is a luxury because most of the country's working population is jobless. According to the U.N., more than half of the country's population (those between the ages of 15 and 64), is unemployed; the unemployment rate for youth is 67 percent. In addition, 40 percent of Somalia's population also lives below the poverty line.

How much power does Somalia have?

Current generation capacity is 106 megawatts, largely composed of expensive and pollutant diesel generators, though Somalia has great potential for solar and offshore wind power generation that can support a transition to green energy and reduce GHG emissions.

Is biomass a source of electricity in Somalia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Somalia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.
