South Korea solaris solution

South Korea's annual installed PV capacity will likely decline further from 2022 to 2023. Higher interest rates have created obstacles for financing projects, as have reductions in feed-in tariffs and other policies supporting PV deployment.⁹ In addition, South Korea's government has been investigating allegations that

South Korea stands at a critical juncture in its energy landscape, with a pressing need to transition towards renewable sources. Despite its position as the 8th largest electricity market globally, the country faces challenges in progressing renewable energy, and currently imports 90% of its energy supply.

Solis made a great first impression with its best-selling models, bringing more PV solutions to South Korea. To meet the local certification requirements in South Korea, Solis has specially developed the residential and C& I models for the country, i.e., Solis-33K-5G-KR and Solis-110K-5G-KR.
