

One of the causes of the infamous incident: The car was originally designed to be electric. Switching to a combustion engine eliminated the heavy battery, resulting in the center of gravity shifting too far upwards. The ...

Sfide e opportunità; A Intersolar, la fiera internazionale per le energie rinnovabili, HORIEN Salt Battery Solutions ha presentato le sue batterie al sale. Forte di un'esperienza decennale maturata in molteplici settori e di oltre 1 GWh di prodotti installati, l'obiettivo è raddoppiare i volumi nel 2025.

The story of salt battery innovation took a major leap in 2016 when Ticino-based manufacturer HORIEN Salt Battery Solutions (previously FZSoNick) partnered with Swiss research institute Empa. With funding from Switzerland's Innosuisse and later the Swiss Federal Office of Energy (SFOE), they embarked on an ambitious mission: refining the salt ...

Take a look inside HORIEN's salt battery. Video used courtesy of HORIEN . The first salt battery, known as ZEBRA, was patented in 1978, and the architecture has attracted the interest of various industries over the years. From the ZEBRA battery, salt batteries have undergone development iterations. Salt battery architecture has been ...

The battery that should have been installed in the A-Class was a so-called salt battery. In contrast to most other batteries, in which the cathode and anode are immersed in a shared pool of liquid electrolyte, the electrolyte in a salt battery is a solid, namely a ceramic ion conductor based on sodium aluminum oxide.

Sales Manager Telecom, UPS & Railway at HORIEN Salt Battery Solutions, formerly FZSoNick, is the world's first player to offer a safe & fully sustainable energy storage & backup solutions. Experienced Sales Manager with a demonstrated history of working in the electrical and electronic manufacturing industry. Skilled in Energy Storage, Batteries, Product Marketing, Electric ...

Horien (formely named FZSoNick) is a global leader in energy storage solutions using the sodium metal chloride (SMC) technology. Horien manufactures batteries in Stabio, Ticino (CH), on a plant area of about 20'000 sqm on three floors.

The research collaboration began in 2016 when the Ticino-based salt battery manufacturer HORIEN Salt Battery Solutions, formerly known as FZSoNick, approached Empa. The company wanted to improve the ceramic electrolyte consisting of sodium aluminum oxide, also known as beta-alumina, in its battery cells as part of an Innosuisse project.

Sudan horien salt battery

Solutions is the world's first player to offer a safe & fully sustainable energy storage & backup solution: from raw material sourcing, zero environmental emissions, absence of toxic materials, to maximum component recyclability. All of this is built in close ...

Originally developed for electric cars, nowadays they supply mobile phone antennas with electricity, and tomorrow perhaps entire districts: The salt battery is a safe and long-lasting battery technology with huge potential.

This "what if" moment shines a light on a lesser-known but compelling technology: the salt battery. While largely overshadowed by lithium-ion batteries in electric mobility, salt batteries bring unique benefits that make them a game-changer for stationary power storage and applications where safety and durability are paramount.

One of the causes of the infamous incident: The car was originally designed to be electric. Switching to a combustion engine eliminated the heavy battery, resulting in the center of gravity shifting too far upwards. The battery that should have been installed in the A-Class was a so-called salt battery.
