

Iran allocates 2,178 hectares of land for solar farms, aiming to launch two specialized solar parks by February 2024. The move aligns with the country's commitment to renewable energy, leading to significant savings in natural gas consumption and water usage.

As of January 2024, Iran's Small Industries and Industrial Parks Organization (SIPO) announced plans to build 17 solar parks across six provinces, with five already under construction. The country aims to: Increase solar panel production capacity: to 2.3 gigawatts per year;
