

Svalbard and Jan Mayen solar panels for offices

Where are Svalbard and Jan Mayen located?

The islands are located north and northwest of Norway, within the southern limits of Arctic sea ice -- the northernmost point of Svalbard is within a 620 mi (1,000 km) of the North Pole. Svalbard is approximately 24,570 square mi (63,000 square km); Jan Mayen is approximately 145 square mi (373 square km).

How many people use the Internet in Svalbard and Jan Mayen?

According to Kepios analysis, 37.0 percent of the population in Svalbard and Jan Mayen, or 944 people, did not use the Internet at the beginning of 2022. This means that approximately the remaining 63.0 percent, or 1,338 people, used the Internet.

Could a new solar project help remote Arctic communities transition to green energy?

Norway has installed the world's northernmost ground solar panels in its Svalbard archipelago, a region plunged in round-the-clock darkness all winter. The pilot project could help remote Arctic communities transition to green energy.

Where are the world's northernmost solar panels installed?

Norway has installed the world's northernmost ground solar panels in its Svalbard archipelago, despite the region being plunged into darkness from early October until mid-February every year. Norway has installed the world's northernmost ground solar panels in its Svalbard archipelago, a region plunged in round-the-clock darkness all winter.

Why do solar panels work in Isfjord Radio?

The solar panels also benefit from the "albedo" effect, the reflective power of snow and ice, as well as low temperatures that improve their efficiency. On the flipside, the region is plunged into total darkness from early October until mid-February, which makes it impossible for Isfjord Radio to completely give up fossil fuels.

PV Tech has been running PV ModuleTech Conferences since 2017. PV ModuleTech USA, on 17-18 June 2025, will be our fourth PV ModuleTech conference dedicated to the U.S. utility scale solar sector.

The Norwegian state-owned company Store Norske Energi installed the world's northernmost solar farm. The developed pilot project with 360 solar panels is located in Svalbard on the Spitsbergen island - Svalbard's only permanently inhabited island, located 1,300 km (808 miles) from the North Pole.

The flora of these islands in the European sector of the Arctic does not differ greatly from the general aspect of the flora of Greenland in the west, Franz Josef Land and Novaya Zemlya in the east, or Kola and northernmost Norway in the south. This especially concerns Bear Island and Jan Mayen, both of which are inhabited

Svalbard and Jan Mayen solar panels for offices

by a meager flora.

We show the climate in Svalbard & Jan Mayen by comparing the average weather in 2 representative places: Olonkinbyen and Longyearbyen. You can add or remove cities to customize the report to your liking. See all locations in ...

Store Norske Energi, a state-owned energy company based in Longyearbyen, is testing whether solar energy could be used to transition Spitsbergen to emissions-free, hybrid energy. The company has installed 360 solar panels along with a battery bank and thermal storage system at Isfjord Radio, an old shipping radio station.

The world's northernmost solar PV installation is located at the Svalbard Airport, in Norway. The plant can meet up to 75% of the electricity demand of the airport in the clear and sunny days.

NEOSUN Energy has been delivering leading quality commercial solar installations to businesses from large corporates to SME's. See how we've helped customers go green and save money on their power bills by installing solar in these various different installation conditions.

Norway has installed solar panels in its Svalbard archipelago, a region plunged in round-the-clock darkness all winter, in a pilot project that could help remote Arctic communities transition to green energy.
