

Will Iraq introduce solar energy?

ERBIL, Kurdistan Region - Iraq's Prime Minister Mohammed Shia' al-Sudani on Thursday approved plans to introduce solar energy systems into Iraqi households, in a bid to ease the load on the national electricity grid and combat electricity shortages.

What is Iraq's solar energy strategy?

Iraq's solar energy strategy should be based on attracting foreign direct investments with strong commitment to diversifying its energy mix and to become energy independent bolstered by its willingness to collaborate with international array of local and foreign partners. Iraq's path forward is not, however, free of potential pitfalls.

Why does Iraq need a solar map?

The solar map will help to identify Iraq's best solar resources, informing and facilitating renewable energy planning across the country. The map has been very important for showcasing Iraq's potential solar resources, key information about land availability, populated areas and grid access.

How much solar power does Iraq have in 2023?

According to the latest statistics by the International Renewable Energy Agency, it had just 1,599 megawatts of renewable energy capacity at the end of 2023. Iraq has abundant untapped solar resources that could allow it to achieve its target and reduce reliance on imports of electricity.

How many solar power sites are there in Iraq?

In July 2019, Iraq's Ministry of Electricity invited independent power producers to participate in developing seven PV solar power sites with a combined capacity of 755 megawatts (MW) in the range between 30 MW to 300 MW. Many local and foreign developers saw the announcement as a move forward in an attempt to diversify the country's energy mix.

How much solar capacity will Iraq have by 2030?

Iraq's solar plans announced in November 2021 call for the addition of 12 gigawatts of solar capacity by 2030. Some 7.5 gigawatts of the planned solar capacity are to come from utility-scale solar plants, and Iraq has reached agreements with developers - at varying stages - for projects that will add 4.5 gigawatts of the total.

The Iraqi Ministry of Electricity has been aiming at increasing the share of renewable energy in Iraq but was faced with several challenges including the contractual process for utility scale solar energy. The OSC are a potential solution that could be tailored to the Iraqi context.

Solar Panel System in Iraq. A Land of Sunshine. Iraq boasts exceptional solar energy potential. The country receives an average of 5.6 kWh of solar irradiation per square meter daily, with over 3,000 hours of sunshine annually. This translates to an abundance of free, clean energy waiting to be harnessed. Benefits of Solar Power in Iraq
