The meaning of solar thermal power generation technology

#2 Concentrated Solar Power Plants or Solar Thermal Power Plants . Concentrated Solar Power Plants (CSP) do not convert sunlight directly into electricity. Instead, they use mirrors, lenses, and tracking systems to focus a large area of sunlight into a small beam. It is ...

Although China's solar thermal power generation technology research started late, but in recent . years the government of solar thermal power technology to give a lot of policy support. In 2007,

Solar Thermal Power Generation. Concentrated solar power (CSP) turns sunlight into electricity. It focuses sunbeams with mirrors or lenses to heat liquids. This heat then powers turbines to create electricity. Even though CSP setup costs more at first, its ability to store thermal energy means it can work day and night.
