Demand for electricity in Togo has increased rapidly in line with economic growth, but energy production capacity remains insufficient to trigger structural transformation and private sector development. The progress made and the favourable outlook should help to achieve universal access to electricity, which the authorities have set for 2030.

Eric joined Azimuth Energy in 2024 to lead the firm's sales planning for commercial and industrial solar projects as well as support site assessments and channel partner management. He oversees data analytics to provide guidance and support on marketing, training and channel partner effectiveness. ...

PDF | This work uses bottom-up modeling to explore the future evolution trajectories of the electricity mix in Togo by 2050. The objective is to... | Find, read and cite all the research you need...

In Togo, rural electricity projects are steered by the Rural Electrification and Renewable Energy Agency. Several companies, including BBOXX, EDF, and Sun King-Soleva, are actively working to promote universal access to electricity by developing innovative technologies and providing solar energy services to communities not connected to the grid.
