

Tork energy Australia

At TORK, sustainability is at the core of all our operations. One of our most significant steps towards this goal is transitioning to renewable energy by installing solar panels on our factory rooftops. With solar energy, we aim to reduce our carbon footprint, increase energy efficiency, and enhance our environmental contribution.

The Bureau of Meteorology and NIWA data shows the average temperature in Australia and New Zealand has risen approximately 1°C since 1910. Even this slight change can have a significant impact. Activities, like burning fossil fuels, deforestation and agriculture are major causes of climate change.

The Energy Council, in partnership with NASDAQ, hosted the 2024 New York Energy Capital Assembly on June 6 - 7. We gathered 250+ prominent investors, E& P players, and decarbonization technology providers across the energy value chain, addressing topics such as the evolving dynamics of capital formation and deployment, ongoing consolidation trends ...
