Our vision far exceeds stand-alone renewable energy; we aim to take homes into the future - including real estate construction and development, renewable home development, smart home technology, solar energy, security systems, battery storage, solar ...

At Tron Solar, we harness the power of the sun to generate clean energy for your home or business. Our solar panels convert sunlight into direct current (DC) electricity, which is then converted to alternating current (AC) power by our inverters. This AC power is what powers your household appliances and devices. The Importance of Energy Storage

Established in 2018. Tron Solar is a National leading solar energy provider for homeowners and commercial properties. Located in Illinois, Ohio, and Florida, we've helped hundreds of homeowners convert to solar energy. We take pride in successfully reducing families' power bills, positively impacting the environment and saving them money by converting to solar energy. ...

Tron Solar Costs and Financing. The cost of installing a solar power system with Tron Solar is roughly in line with the average cost of solar panels in Illinois. The typical system cost with Tron is around \$25,800 before the federal credit or \$18,060 after the credit, though your actual price can vary based on the size and complexity of your ...

Tron was created by Lester Gray after moving to Illinois with little money, a lot of determination and one big vision to make solar affordable and efficient in Chicagoland. After a quick establishment as a leader in the solar field, Tron's ...
