What is the Tunisian Solar Plan?

The Tunisian Solar Plan contains 40 projects aimed at promoting solar thermal and photovoltaic energies, wind energy, as well as energy efficiency measures. The plan also incorporates the ELMED project; a 400KV submarine cable interconnecting Tunisia and Italy.

Is Tunisia a good place to invest in solar energy?

Tunisia's climate presents a key solar energy opportunity and, together with an improved investment framework and a highly skilled workforce, the country should be well positioned to support its ambitious Plan Solaire Tunisien. However, to date, Tunisia has fallen short of its intermediate solar PV targets.

Where is the first large scale solar power plant in Tunisia?

The first large scale solar power plant of a 10MW capacity, co-financed by KfW and NIF (Neighbourhood Investment Facility) and implemented by STEG, is in Tozeur. TuNur CSP project is Tunisia's most ambitious renewable energy project yet.

How much money is needed to implement the Tunisian Solar Program?

The total investment required to implement the Tunisian Solar Program plan have been estimated at \$2.5 billion, including \$175 million from the National Fund, \$530 million from the public sector, \$1,660 million from private sector funds, and \$24 million from international cooperation.

Why should we focus on the plan Solaire Tunisien?

Edward Koenen, Vice Chair of the SolarPower Europe Global Markets workstream, Head of Finance and Sales at ABO Wind, said; "Now more than ever, we must focus on how to achieve the objectives of the Plan Solaire Tunisien and how to drive the Tunisian energy transition forward.

Will Tunisia hit a terawatt level by 2025?

Figures for Tunisia's new solar capacity, electricity tariffs, and energy mix have all been updated. "Globally, solar capacity has hit the Terawatt level - and that's set to more than double by 2025. It is crucial that key global markets are empowered to join the worldwide solar Terawatt pathway.
