At Ovik Solar Park, we offer over 40 parameters to help you choose the ideal location for your solar project. Our pre-approved land parcels come with all necessary government approvals and connectivity, reducing setup time and complexity.

At Ovik Solar, we"re all about practical solutions. Our team collaborates with industrial clients to cut through the complexity of energy bills by seamlessly integrating advanced solar technology into their operations. Our state-of-the-art photovoltaic systems capture sunlight and convert it into clean, cost-effective electricity.

Currently, 1.5 GW of wind and solar projects are at financial closure or groundbreaking stages, marking solid progress toward this target as the country"s current total installed capacity stands at 8.3 GW. On the other hand, Turkmenistan has yet to establish renewable energy targets, despite generating almost no power from renewable sources.

Turkmenistan has tremendous potential for harnessing solar energy. With more than 300 sunny days annually and with average annual intensity of solar radiation ranging between 700-800 watts per square meter (W/m2), the total technical potential of solar energy amounts to 655 GW (Seitgeldiev 2018; UNDP 2014).
