automatic battery backup system must have a capacity between 3 kWh to 20 kWh.

The maximum capacity of the battery installation has also been increased, with systems as large as 20 kWh now eligible. VIEO has also expanded the purchase options applicable to the rebate, and is now allowing consumers to buy battery packs and other hardware from vendors outside of the territory.

The Virgin Islands Energy Storage (VIBES) Rebate Program provides up to \$4,000 in rebate incentives for the installation of new residential or commercial battery storage systems as long as they are accompanied by either an automatic transfer switch or ...

The average home uses 900 kWh per month, or 10,800 per year, according to the U.S. Energy Information Agency EIA. That means the average power required per day is 30 kWh. Now, when sizing a grid-tied solar battery system for daily usage, you will want a system that can deliver up to 30 kWh, or possibly more for peak usage days.
