

# U S Virgin Islands solar energy for agriculture

How much of the US Virgin Islands' electricity is generated by solar?

In 2020, about 20% of the US Virgin Islands' electricity was generated by renewables. Approximately 80% of this renewable capacity came from customer-installed, small rooftop solar panel systems, while the remaining 20% came from utility-scale solar energy facilities.

Why should the US Virgin Islands own solar assets?

The US Virgin Islands should invest in solar assets for enhanced portfolio diversification and risk mitigation. WAPA ownership guarantees coverage by WAPA and FEMA during natural disasters, eliminating uncertainties (1. Enhanced Portfolio Diversity: WAPA diversifies its energy portfolio, ensuring a more resilient and sustainable future).

Will St John be the first state to be fully powered by solar?

St. John is poised to be the first state or territory to be fully powered by solar energy. The government expresses unwavering confidence in WAPA's ability to maintain these assets and extends heartfelt gratitude to VIElectron and Honeywell for their transformative contributions.

We're an award-winning solar energy company serving The U.S. Virgin Islands with a passion for clean, affordable energy. We offer a variety of renewable energy products for every home, every business, and every budget. Our team of solar energy professionals has over a decade of experience serving the people of the USVI and can tackle any clean energy challenge.

Discover Agri-PV (Agrivoltaics), the innovative dual-use solution combining agriculture and solar energy production. Learn how Netafim's expertise in precision irrigation, agronomic support, and sustainable energy systems can transform your farm with ...

The Virgin Islands Energy Office's successful selection of its Solar for All application has presented a historic opportunity for the territory to fast-track an equitable energy...

Approximately 35% of the US and approximately 82% of DOI lands are "drylands" found throughout the western US. These lands contain oil, gas, oil shale, shale oil, and tar sand deposits and the exploration for and extraction of these resources has resulted in hundreds of thousands of operating and abandoned wells across the West.

3 ???&#0183; ST. CROIX -- Officials cut the ribbon at the Petronella Solar Farm on Tuesday, bringing a new wave of renewable energy to the island, which is experiencing rolling blackouts due to a fuel shortage.

2 ???&#0183; Located on the east end of St. Croix, the solar farm supplies WAPA with 10 megawatts of clean

US Virgin Islands Updates. The Biden-Harris Administration is making a historic investment in rural communities, expanding clean energy and supporting American energy independence, investing in popular conservation programs and climate-smart agriculture, and ...

This visionary partnership is set to transform the energy landscape of the US Virgin Islands through the deployment of cutting-edge Battery Energy Storage Solutions (BESS) across six strategically positioned solar parks. The implications are monumental, with massive cost savings and a resounding commitment to decarbonization.

The U.S. Department of Agriculture (USDA) and U.S. Department of Energy (DOE) are working together to support farmers and rural communities make informed decisions about renewable energy. These initiatives address the unique needs of farmers and communities and are aimed at cultivating new economic opportunities that enable agricultural communities to thrive.

The U.S. Virgin Islands is taking significant strides toward a sustainable and resilient energy future, primarily through the implementation of ambitious renewable energy projects. These initiatives are set to reduce dependence on fossil fuels, lower electricity costs, and enhance energy security for the islands' residents.

Washington, DC - The U.S. Environmental Protection Agency announced this week that the Virgin Islands Energy Office (VIEO) was selected to receive approximately \$62.5 million to develop solar programs - the highest amount available to the territory in this competitive grant program. The grant will enable low-income and disadvantaged ...

In a significant step forward for renewable energy in the U.S. Virgin Islands, Honeywell announced its collaboration with VI Electron on Tuesday. This partnership marks the beginning of an ambitious plan to implement the first of several advanced battery energy storage solutions (BESS) in up to six strategically placed solar parks across the territory. The [...]

Discover 2024 solar and battery storage incentives for USVI residents, including the Federal ITC, VI Battery Energy Storage Rebate, and USDA REAP Grant. Learn how to save with solar tax rebates, loans, and grants in St. Thomas and St. John, USVI.

This visionary partnership is set to transform the energy landscape of the US Virgin Islands through the deployment of cutting-edge Battery Energy Storage Solutions (BESS) across six strategically positioned solar parks. The ...

Alternative energy sources such as wind, geothermal, hydro and solar have grown increasingly popular as ways to reduce greenhouse gas emissions and strengthen the grid by decentralizing power production. Solar energy, which converts energy from the sun into thermal or electrical power, is rapidly expanding across America and the world.

The U.S. Virgin Islands Energy Office offers residents an energy storage rebate through the VI Battery Energy Storage (VIBES) Rebate Program. The program launched on May 23, 2024. The rebate amount is \$300/kWh of installed storage capacity, with a max incentive of \$4,000 for approved purchases.

3 ???&#0183; "When I look around here today, I see the Virgin Islands getting out of the river when it comes to energy problems." Under the Water and Power Authority's interconnection agreement, WAPA will buy power generated by the solar farm at nearly 11 cents per kilowatt-hour and excess energy stored in the site's batteries will be sold to the ...
