The advantage of solar pumps is that they are dependable in rural and remote areas. Solar water pumps are lightweight and easy to transport and relocate, and they have extremely low operating costs. Solar water pumps are simple to set up on your own. This means you won't have to wait for someone to come out and install your water pump.

It all starts with installing solar panels on your roof or in a sunny part of your home. Sunlight is captured and converted into direct current (DC) electricity by these panels. 2 nversion of Inverters. The direct current (DC) electricity generated by your solar panels is then sent to an inverter, which transforms it to alternating current

Uganda setup solar panel at home

(AC).
