

Varta energy storage Syria

Are Varta energy storage systems safe?

VARTA energy storage systems are available as complete AC systems with an integrated battery inverter or DC systems, making them perfect for both retrofitting and new installations. When it comes to safety, we do not compromise. That's why we rely on a multi-level security concept, from development to installation.

What is a Varta energy storage system?

The basic idea of an energy storage system is the ideal management of the differences between the generation of electricity and the actual consumption. With a VARTA energy storage system, you can temporarily store the energy you have produced yourself and use it when you actually need it.

Are Varta energy storage systems suitable for retrofitting?

The VARTA energy storage systems as AC all-in-one systems with integrated battery inverter are perfectly suitable for retrofitting as well as for new installations. Our new generation of DC high-voltage storage units.

How can I monitor my Varta energy storage systems?

As certified installer you can monitor your storage systems within the VARTA portal. With more than 130 years of battery expertise made in Germany VARTA energy storage systems stand for quality and reliability. This also includes the training and certification of our partners.

Does Varta offer a warranty on batteries made in Germany?

As battery experts made in Germany, we give you up to 10 years' warranty- because we know we can rely on our energy storage systems. 2 As a technology company, VARTA is the only provider of energy storage systems to have more than 130 years of expertise in batteries made in Germany.

What are the capacities of the Varta wall?

The three available capacities of the VARTA wall are equipped with the most modern 21700 round cells in the VARTA double module. Our smallest energy storage system on the market and a smart entry into independence!
