

ABAT (MOROCCO) (ITALPRESS) - Slovenia welcomed the Moroccan Autonomy Plan as "a good basis for reaching a definitive and consensual solution" to the regional dispute around Western Sahara, under the auspices of the United Nations Secretary General and of his personal envoy.

The Enercon hand-held cap sealer deliver reliable, repeatable induction sealing and feature quality aids such as batch counters and no-foil indicators, which are often only found on inline production machines. Our unique coil design facilitates the sealing of a wide range of caps including flat, sauce dispensing and conical caps, at diameters ...

Enercon is a renewable energy equipment company that manufactures and supplies wind energy converters (WEC). It produces components of the WECs including annular generators, inverters, cast components, rotor blades, towers and machine houses.

About Western Sahara Where is Western Sahara? Western Sahara is located to the south of Morocco and north of Mauritania. As its name suggests, it is located right in the middle of the Sahara Desert. It spans over 272,000 square kilometers (105,000 square miles) and is the most sparsely populated "country" on the continent (and second globally).

The 2020 Windpower Monthly products of the year awards celebrate these achievements, but they also aim to inspire and fuel further growth and excellence. That's why we're hosting a ...

Enercon is already under contract to deploy 90MW capacity in the country. The company entered the Vietnam market in 2018, and since then it is said to have been continuously expanding its presence in the country. A ...

The Global Leader in Induction Cap Sealing About Enercon Over the past 40 years, Enercon Industries has established itself as the principal provider of induction cap sealing systems across the globe. Enercon. Skip to content. Enercon Industries Ltd | +44(0)1296 330 542 | ...

Enercon produces a range of sensors to help ensure that the sealing process is running faultlessly, producing consistent, reliable seals on every container. Induction cap sealing is one of the last processes that products undergo when travelling from raw materials to shipped product through the factory. Many of the issues ...

The European Court of Justice (ECJ) has repeatedly ruled that Western Sahara, a non-self-governing territory, must be treated separately from Morocco in trade agreements and resource exploitation. This legal stance highlights a critical issue: the ongoing activities of European companies extracting resources in Western Sahara without the ...

Enercon said that except nacelles all the main components of the wind turbine will be produced in Turkey. Enercon Region Central Asia, Middle East and Africa (CAMEA) Sales & After Sales director Tayfun Bayraktar said: "With 25 years of experience and our well-established supply chain network, we developed the E-138 EP3 turbine type as the most highly localised ...

Enercon is a renewable energy equipment company that manufactures and supplies wind energy converters (WEC). It produces components of the WECs including annular generators, inverters, cast components, rotor blades, towers and machine houses. Enercon provides electrical and mechanical maintenance, project development, charging service, energy ...

Enercon's cap sealing experts will match our high performance sealing heads to meet the needs of your specific application. Each sealing head design is engineered to maximize the amount of sealing energy applied to your induction liner. This optimizes sealing efficiencies and ...

The 2020 Windpower Monthly products of the year awards celebrate these achievements, but they also aim to inspire and fuel further growth and excellence. That's why we're hosting a virtual roundtable in partnership with award winners Enercon and ZF Wind Power, to discuss future progress with the top turbine category winners.

Enercon engineers have developed a range of induction sealing heads to maximize the efficiency of your sealing process. Flat and tunnel sealing heads are interchangeable and our all-in-one sealing head covers operations with a wide ...

As part of the agreement, Enercon will supply its new E-160 EP5 E2 wind turbine. This features a 5.5MW direct-drive permanent magnet generator, capable of generating more than 21.5GWh of energy. Ea Nam wind ...
