

# Zimbabwe smart grid metering

Will Zimbabwe have a smart grid?

All smart meters to be installed in Zimbabwe are a foundation of a smart grid that could, in future, enable micro renewable generation and dynamic supply and demand. Smart meters will be fitted with SIM cards to allow for dual communication.

How does the mini-grid system work in Zimbabwe?

In Zimbabwe, most mini-grids use a 3-tier tariff system. Businesses, households, and social services (schools and clinics) each have their own tariff. The tariffs can be charged per kWh or in the form of a monthly flat rate. An alternative tariff model can be based on the number of bulbs a user has.

What is ZESA partnering with Econet Wireless Zimbabwe?

FIND IT! ZESA Holdings has partnered with Econet Wireless Zimbabwe to roll out its ambitious US\$35 million prepaid and smart metering programme aimed at reducing debt risks due to payments default by major electricity consumers.
